INTELLIBRITE® 5G COLOR LED LIGHTS

UNDERWATER LED LIGHTS FOR SWIMMING POOLS AND SPAS

Featured Highlights

- A superior reflector design assures more light is directed toward the pool bottom to further increase intensity and color effects, while minimizing glare
- Superior lens geometry distributes light in an optimum way to avoid "hot spots" on the pool bottom. Light intensity and color are distributed more uniformly throughout your pool.
- Pool lens can be rotated to 180 degrees to provide wide beam pattern (standard) or narrow beam pattern
- IntelliBrite LED Light technology makes use of the brightest and most energy efficient LED's available in underwater pool and spa lights – up to 50% less energy consumption than competitor's lights
- Set one of 5 predetermined fixed colors to match or create the mood for the evening – blue, green, magenta, white, and red or select from 7 popular "color shows" that come preprogrammed into IntelliBrite Light
- IntelliBrite LED Light was designed to work with IntelliTouch® and EasyTouch® Automation, the leading control systems for pool, spa, and poolscape equipment automation. In effect, you transfer control of IntelliBrite light to the IntelliTouch or EasyTouch system which controls all your other backyard and pool features.
- IntelliBrite 5g Color Pool and Spa lights are backwards compatible with first generation IntelliBrite lights

Note: All 120 volt pool and spa lights must be connected to a branch circuit protected by a ground fault circuit interrupter (GFCI).

Note: All cord lengths over 50 feet on 12 volt lights create resistance that dramatically reduces the light output. This condition exists on all low voltage lights regardless of design or manufacturer.
